

A CHAIR FOR EMBELLISHING THE LIVING ROOM

The concept for the Dangla chair emerged from an original intuition: being able to 'dress' a chair in different fabrics. The design is very simple, with a slim, tapering metal frame for the legs, seat and chair back. Smooth, textured or with a zip, Dangla can be covered with any of the LAGO fabrics, making it adaptable to any interior.

Perfect for the living room but also the dining room, the Dangla chair can be easily customised, using interchangeable fabrics of different types and in different hues.

HIGHLY CUSTOMISABLE

Changing the fabric is really quite simple. Dangla can be covered and recovered with three different types of fabric: smooth, crimped and with a zip in various colours.
