

AN ELEGANT, ECO-SUSTAINABLE CHAIR

Steps is a chair that respects the environment, with a seat and chair back that are made of industrial felt and rest on an aluminium frame.

These innovative and entirely recyclable materials give the chair an elegant, light look.

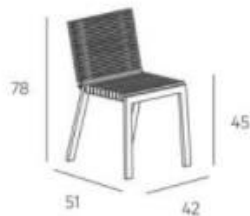

The Steps chair is also available as a stool, a perfect seat for the kitchen or dining room, thanks to its original design.

COMFORT AND INNOVATION

The felt pieces are oriented along their width, ensuring solidity and comfort to the backrest and seat.
