

## Air Bed

UNDER THE BED, JUST CLEAN AIR

Designer Daniele Lago - 2008

## AN AIRY, MODERN BED

The effect of the floating, ethereal Air bed is created by the absolute **transparency** of the extra-clear **tempered glass** that supports it. The bed seems to levitate off the ground, creating the feeling of sleeping in a cloud. The **platform of the bed** is suspended on **four nearly invisible glass legs** that give it a strong feeling of **lightness**. In all of its sizes, **double, single and three-quarter**, Air is an elegant, refined bed perfectly suited to any interior.

The Air bed, picking up the concept of the Air sofa, is **highly transformable**: components like back rests, shelves and drawers can be attached to the frame at any point, and you can even add a shelf that runs along the entire perimeter.

Moreover, installing a light under the base of the bed, you can create an evocative theatrical effect.

## FEATURES

### ONE BED, TWO HEIGHTS

The four glass legs on which the bed base in HPL is suspended make it possible to adjust the height of the bed depending on the side on which they are attached. This allows for configuring the bed with two different heights.
