

Steel Bed

THE PERFECT EVOLUTION OF AIR SUSPENSION.

Designer Daniele Lago - 2019

FIND MORE

The outcome of continual aesthetic evolution, Steel bed can be used to create light suspended solutions and avoid wall mounting, thanks to its elegant steel legs, in a Titanio steel or Peltro steel finish. The different sizes and finishes for the headboard provide a very personal touch and refined colour contrasts in the bedroom.

FUNCTIONAL SHAPES

No bed base and suspension on two steel legs allows for unhindered movement around the bed, which also makes cleaning easier.
