

## Steel Free Bed

SUSPENSION AND CREATIVE FREEDOM IN THE ONE BED.

Designer Daniele Lago - 2019

[FIND MORE](#)

The Steel Free bed stands out thanks to two central steel legs that leave the perimeter of the bed lifted off the ground and create a feeling of suspension and weightlessness. The sturdy legs provide stability and the bed does not need to be wall mounted. The new Free headboard also allows you to match two different materials of your choice, including the innovative XGlass, for a highly multipurpose, big-appeal look.

## FEATURES

### VISUAL LIGHTNESS

Two central steel legs emphasise the sensation of suspension and surprising lightness, at the same time making it extremely sturdy.
