### A BUNK BED TO STIMULATE FANTASY AND CREATIVITY

The bunk bed is a perfect space-saving solution to furnish the children's bedroom. What's better of a beautiful tree house to stimulate your imagination? This is precisely the concept of the LagoLinea Weightless bed: a bunk bed for children where they can dream and have fun.

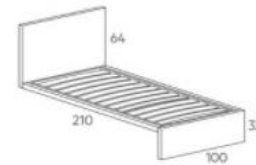

LagoLinea Weightless bed is a design furniture that stimulates imagination and exploration, without forgoing security: a suspended bunk bed that allows children to play in peace, thanks to the strong wall attachment system. The stepladder of this bunk bed for children is available in 3 different heights: this allows you to configure it according to the ceiling and to replenish the available space with a second bed or with storages, perfect to contain children's games. A design element that increases the available space in the bedroom and that allows you to adorn it with desks and chairs too.
