

## Air Table

A unique and original floating table

Designer Daniele Lago - 2006

### ELEGANT AND AIRY, DESIGNED FOR THE LIFE THAT HAPPENS AROUND IT

Essential and surprising, the Air table seems to float in the air. Two almost invisible glass legs support the table top, which seems suspended in mid air. The extra-clear tempered glass creates a sensation of airiness and brings light to the room.

The table top is available in a range of finishes, each one capable of filling the interior with personality: from the warmth of wood in the Wildwood version to the refinement of coloured glass, the Air table complements different contexts and styles with originality.
